Foreword

I am pleased to present the 'Judicial Statistics Book' for the year ended 2020. This is one of the publications in our annual series of judicial statistics and contains data related to the cases conducted by the courts in the same period.

The main purpose of this series is to make judicial information, including performance of courts and case management trends, easily accessible to stakeholders and the public. The information compiled in this book is presented with the aim of aiding government agencies, international development partners, policymakers, researchers and educators in formulating evidence based policies and programs. At the same time, the information presented would help law makers and other relevant institutions to make well-informed decisions in bringing positive reforms to the Maldives Judiciary.

Over recent years, the total number of cases lodged to lower and upper courts remained above 20,000 and was at 17,562 in 2020. Despite the challenges emanating from the Covid-19 pandemic, several efforts were made to minimize delays and maximize performance of the courts last year. Due considerations were given to monitor and prioritize cases pending in the courts, whilst monthly data collection and analysis were carried out to identify and manage case proceedings effectively.

To make judicial information easily accessible to relevant stakeholders, 2 main judicial statistics reports containing details of cases filed, concluded and pending in the court system were published last year. The two reports; "Case Management Report 2020 – First Six Months" and "Case Management Report 2020 – Third Quarter" highlights the performance of lower and upper courts, and identifies case management progress of the court system.

As of 31 December 2020, a total of 11,548 cases remained pending with upper and lower courts. Similar to lodged cases, the number of cases concluded by courts also decreased in 2020, recording a drop of 26.25% compared to 2019. Hence, case clearance rate for the year 2020 stood at 89.8%, indicating a 12% decline compared to 2019. A sharp decline in the number of concluded cases in 2020 was observed, as courts had struggled to carry out their functions amidst the Covid-19 pandemic.

The statistics collected on marriage and divorce indicate that a total of 4,997 marriages and 2,984 divorces were registered in 2020, out of which 60.1% of marriages and 68.9% of divorces were recorded with the magistrate courts.

The statistics collected by the Department of Judicial Administration sheds light on several societal issues and helps in assessing the crime structure of the country. It is thus our goal to make judicial information accessible to a vast group of stakeholders in a timely manner. I hope that this publication would be a great addition to the series of judicial statistics and would like to take this opportunity to express my sincere gratitude to all judges and staff of the judiciary for their contribution in making this series a success.
